

ECO-D-THATCH(P) TURF DETHATCHER

WITH THE ADDITION OF ECO-D-THATCH, NATURE CAN KEEP UP WITH THE ACCUMULATION OF DEAD PLANT MATERIAL IN A LAWN

BENEFITS OF USE:

- Treats and controls thatch layer in turf;
- Helps minimize thatch-related turf maintenance problems;
- Accelerates the decomposition of thatch into nutrient rich humus;
- Allows better water and oxygen penetration;
- May reduce the need for some associated pesticide applications.

Dethatching and aerating machines cut through and disturb the thatch layer, allowing water and oxygen penetration. But thatch is often produced faster than normal decomposition and machines can remove it. The result is a recurring problem that requires repeated temporary treatments; labor costs increase and associated problems persist.

ECO-D-THATCH accelerates natural thatch decomposition and will reduce the need for mechanical treatments. It helps improve soil and turf conditions.

APPLICATION INSTRUCTIONS

Quantity –

- **Light Thatch** – 0.5 oz covers 1600 ft² or 10 oz per acre
- **Medium Thatch** – 0.75 oz covers 1600ft² or 25 oz per acre
- **Heavy Thatch** – 1 oz covers 1600 ft² or 40 oz per acre

Frequency – Apply every 2 to 4 weeks with a sprayer or through an irrigation system.

For further information on application, contact your BIONETIX technical representative.

SPECIFICATIONS

Description	Powder
Packaging	Bulk or water-soluble pouches
Stability	Max. loss of 1 log/yr
pH	6.8 - 7.5
Bulk Density	0.5 - 0.61 g/cm ³
Moisture Content	15%
Nutrient Content	Biological nutrients and stimulants
Storage and Handling	See MSDS.
