

AQUA-FEED™

Direct-Fed Microbial Supplement For Aquaculture

AQUA-FEED™ is a natural microbial feed additive specifically formulated for aquaculture applications to support growth performance, feed utilization, and digestive efficiency in shrimp, fish, and other aquatic species. The formulation combines β-glucans, mannan-oligosaccharides (MOS), beneficial microorganisms, vitamins, nutrients, and minerals to promote intestinal health and overall production performance.

Beyond nutritional supplementation, AQUA-FEED™ helps maintain healthier aquaculture environments by supporting beneficial aerobic microbial activity that assists in reducing ammonia, hydrogen sulfide, methane, and the accumulation of organic waste, contributing to improved water quality and healthier production systems.

Features & Benefits

- Supports digestive efficiency and nutrient utilization
- Supplies beneficial microorganisms to the intestinal microbiome
- Promotes intestinal health and overall animal performance
- Helps improve water quality through beneficial microbial activity
- Assists in reducing ammonia, hydrogen sulfide, methane, and organic waste accumulation
- Supports healthier pond ecology and sustainable aquaculture production

Specifications

Color & Appearance	Light brown powder
pH	4.0–7.0
Total Microbial Count	5×10^9 CFU/g
Shelf Life	2 years

Storage

Store in a cool, dry location. Keep containers tightly closed, before and after opening, to prevent moisture absorption and exposure to direct sunlight. Please follow the recommendations and use the product before the best before date. Contact Bionetix® with questions. Avoid inhalation, eye contact, and prolonged skin contact. Wash hands thoroughly after handling.

Typical Applications

- Shrimp grow-out production
- Fish farming operations
- Hatcheries and nurseries
- Aquaculture feed manufacturing
- Pond and recirculating aquaculture systems (RAS)
- Intensive aquaculture production programs

Directions for Use

Mix thoroughly with complete feed before application.

Recommended inclusion rates:

- Shrimp: 150 g per ton of complete feed
- Fish: 200 g per ton of complete feed
- Other aquatic species: 150–750 g per ton of complete feed

Application rates may vary depending on species, production stage, and nutritional objectives.

Contact your Bionetix® representative for formulation and application guidance.
