

SWINE-FEED™

Direct-Fed Microbial Supplement For Growing Swine

SWINE-FEED™ is a direct-fed microbial supplement formulated to support digestive function, microbial balance, nutrient utilization, and consistent performance in post-weaning, growing, and finishing swine. The product contains a balanced combination of viable microbial cultures and functional fermentation-derived components selected to support a stable gastrointestinal environment and efficient digestion. SWINE-FEED™ is intended for incorporation into complete feeds or dry premixes throughout the grow-finish production cycle, particularly during feed transitions and periods of environmental or production stress.

Features & Benefits

- Supports digestive efficiency and feed utilization
- Helps maintain a balanced gastrointestinal microbial environment
- Supports digestion and utilization of feed components
- Promotes normal intestinal function and digestive stability
- Helps maintain consistent performance during dietary transitions
- Supports growing and finishing pigs during production stress
- Suitable for complete-feed and dry premix formulations
- Supports consistent feeding programs throughout the grow-finish cycle

Specifications

Color & Appearance	Beige powder
pH	4.5–6.5
Total Microbial Count	5×10^9 CFU/g
Shelf Life	2 years

Storage

Store in a cool, dry location. Keep containers tightly closed, before and after opening, to prevent moisture absorption and exposure to direct sunlight. Please follow the recommendations and use the product before the best before date. Contact Bionetix® with questions. Avoid inhalation, eye contact, and prolonged skin contact. Wash hands thoroughly after handling.

Typical Applications

- Post-weaning starter pig feeding programs
- Grower pig feeding programs
- Finisher pig feeding programs
- Commercial grow-finish swine operations
- Complete-feed manufacturing for growing swine
- Dry-premix and supplement formulations
- Feed-transition and ration-change programs
- Production programs requiring digestive and microbial balance support
- Growing pigs exposed to environmental or production stress

Directions for Use

Mix thoroughly into complete feed before feeding. For uniform distribution, first prepare a dry premix by blending SWINE-FEED™ with a portion of the feed or a compatible dry carrier. Add the premix to the main batch and mix until evenly distributed.

Recommended inclusion rates:

- Post-weaning starter diets: 1 kg per metric ton of complete feed
- Grower diets: 0.5 kg per metric ton of complete feed
- Finisher diets: 0.5 kg per metric ton of complete feed

Avoid exposure to excessive moisture and extreme processing temperatures. If the product will be incorporated before pelleting, confirm microbial stability under the intended processing temperature and retention time.

Use only in the swine classes identified on the approved label. Contact your Bionetix® representative for formulation assistance and application guidance.
